

ABLE DESIGN INTRODUCES NEW FLASH MEMORY LABEL APPLICATOR FOR FLASH MEMORY MANUFACTURERS AND DISTRIBUTORS

NEW MODEL 1092-3 REDUCED SIZE MMC FLASH MEMORY LABEL APPLICATOR IS NOW SHIPPING

Mountain View, CA – June 1, 2005 – Able Design (www.abledesigninc.com) announced today that its new Model 1092-3 reduced sized MMC (RS-MMC) FLASH memory label applicator is now shipping. The Model 1092-3 complements Able Design's existing line of label applicators that labels other types of FLASH devices such as SD, MMC, CF, and PCMCIA memory cards. Using the Model 1092-3 automated label applicator, FLASH memory manufacturers and distributors can now perform quick product customization of their generic RS-MMC for customers needing specific branding requirements and still meet their Just-In-Time distribution requirements.

“Our Model 1092-3 label applicator provides our customers a quick and reliable way to label RS-MMC FLASH memory cards,” said John Meadows, Able Design President. “It utilizes our high performance and proven technology for labeling small FLASH memory cards that our customers have grown to appreciate. The Model 1092-3 can label over 5500 devices per hour and requires minimal maintenance. With its small footprint of 12.5” x 18.7”, the Model 1092-3 label applicator can fit anywhere on the production floor and is optimal for small cell base manufacturing systems.”

The Model 1092-3 RS-MMC label applicator is manufactured at Able Design headquarters in Mountain View, CA and is distributed worldwide. The unit is standalone with removable input hoppers allowing for quick feed of FLASH devices to the label applicator. The MSRP is \$12,000 USD. Additional hoppers are optional.
